

YOU'LL ALWAYS
GET THERE FASTER
WITH THE WIND AT
YOUR BACK

MIAMI CHAMELEON

Most everything is more difficult when you're facing unnecessary resistance. You can use whatever metaphor you'd like, and there are many. Facing a headwind. Swimming against the current. Pushing the boulder up the hill. They all create the same image. The task at hand was harder than it needed to be.

Same holds true in IT. When your legacy systems, infrastructure, applications or processes are based on obsolete technologies, your IT operation and your entire organization is working against unnecessary resistance.

Enter Miami-Chameleon, the newly formed joint venture between Miami Tribal Systems Integrators (MTSI) and Chameleon Integrated Services, each bringing proven past performance of helping government agencies successfully achieve the goals of the President's Management Agenda for IT Modernization by transforming the resistance of their obsolete technologies into a modern, agile and secure operation ready to help you

PREPARE. PROTECT. PROSPER.

THE MOST EFFECTIVE MODERNIZATION INITIATIVES ARE COMPREHENSIVE

Often times, government agencies find themselves in a bind between allocating budgets to maintaining legacy systems and the operations to support them with their more aspirational IT Modernization goals. And usually, maintenance and operations consume far more of their budgetary and people resources than they'd prefer, limiting their ability to transform into a more contemporary and agile organization.

The Miami-Chameleon Joint Venture takes a comprehensive, quality approach to modernization spanning infrastructure, application and emerging technologies that allow agencies to reallocate people and budgets to achieve their broader and longer-term modernization goals including:

INFRASTRUCTURE MODERNIZATION

Install, manage and support safe and effective networks at scale to build strong systems and defenses with critical infrastructure including cabling and fiber optic networks, inside and outside of the buildings for voice, data, audiovisual and security systems.

LEGACY TO CLOUD MODERNIZATION

Modernizing even the most obsolete infrastructure with solutions and Cloud migration for long-term success.

ADVISORY SERVICES

Build a roadmap to implement quality process improvements and optimize people, resources and budgets to modernize programs on a long-term basis.

MANAGED SERVICES

Incorporates technological advances in AI and Machine Learning into the Help and Service Desk environments to improve end-user satisfaction, increase efficiencies, improve SLA metrics and reduce costs.

CONTRACTING JUST AS AGILE AS THE END RESULTS

Miami Technology Solutions, Miami Tribal Systems Integrators and Chameleon Integrated Services, are seasoned and recognized Small Minority Disadvantaged Businesses and SBA 8(a) program members. Miami-Chameleon is an 8a Tribally owned JV approved to support work up to TS clearance levels.
